📂 PROJECTS

Billing Software
Freelance Project
05/2025 – present

Working with a team member to develop a custom billing software as part of a freelance project. The application includes features like invoice generation, customer management, itemized billing, & tax calculations, built using **ReactJS** for the frontend and **Firebase** for the backend. Focused on clean UI, reusable components, and real-world business needs.

Frontend : Completed.
Backend : In Process.

Shilpkar
Organized by West London University, Dubai.

Webinar at University of West London, Dubai
Description: Built a responsive website named **SHILPKAR** using **ReactJS** with a team member, showcased during a webinar organized by our company at the **University of West London (Dubai).** Focused on clean UI, reusable components, and responsive design.

Digital Agency Website
03/2025 – 04/2025

Developed a modern, responsive **Digital Agency** website using **ReactJS** and **Tailwind CSS**. The project showcases a clean and professional UI, optimized for performance and user experience. Included sections like services, portfolio, about us, and contact, highlighting frontend best practices and component-based architecture.
